

German
Scientific
Earth Probing
Consortium
GESEP e.V.

The German Scientific Earth Probing Consortium, GESEP e.V. invites within the framework of the DFG-Colloquium IODP-ICDP to the

GESEP School 2023

“Scientific Downhole Logging”

Applications in marine and continental environments

31. August and 1. September, 2023

at the University of Hannover

and the Leibniz Institute for Applied Geophysics (LIAG), Hannover

Key topics:

- Principles of geophysical downhole logging
- Applications in IODP/ICDP-projects
- Hands-on experience on borehole logging equipment
- Cyclostratigraphy on downhole data
- Geothermal applications

GESEP and the Deutsche Forschungsgemeinschaft invite graduate and PhD students as well as Post-doc scientists to apply. Please send a short CV, your motivation and a letter of support to the GESEP School Coordinators Arne Ulfers (Arne.Ulfers@bgr.de) and/or Christian Zeeden (Christian.Zeeden@leibniz-liag.de). The course will be held in English.

Expenses for travel within Germany and accommodation will be reimbursed according to DFG regulations.

Deadline for application is July 12, 2023

Further information is available at www.gesep.org

* (Student) DGGV members and those who will become members during the course can apply for an allowance of 75€ for the GESEP School. Information: <https://www.dggv.de/bildungsangebot/fortbildung/>
